

WET & DRY VACUUM CLEANER

TradePro NT 200

A powerful and robust wet and dry vacuum cleaner. The compact design is especially suitable for operators who often need to move the machine between sites. It provides high stability while maintaining high suction power, thanks to the semi-automatic filter cleaning system.

Technical Specification

Wet & Dry Vacuum Cleaner	NT 200
Air flow rate (l/s):	56
Maximum motor rating (W):	1350
Container capacity (l):	20
Noise level (dB):	73

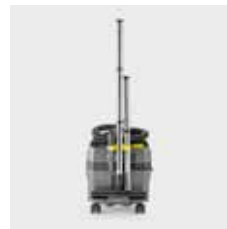

Removable filter cartridge

- Flat pleated filter can be removed easily and tapped out for cleaning

Excellent mobility and stability

- The compact, square design and ergonomically formed handle mean that the machine is easy to transport and convenient to store in a vehicle

On-board accessory and cable storage

- Accessories and small parts can be stored conveniently on the vacuum head and are therefore always readily available for all your cleaning applications
