RS PRO Half Respirator Mask, One Size

RS Stock No.: 918-5790

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This hardwearing respirator mask from RS PRO protects against most harmful fumes. Its ergonomic design means it can be worn for long periods without causing irritation. Made from durable and flexible thermoplastic rubber, it's exceptionally resistant to corrosion and chemicals and provides a comfortable fit for almost all face sizes. An adjustable head harness ensures a secure, comfortable fit for prolonged wear in tough conditions. The mask is reusable and has two filter connections that distribute weight evenly and provide a wider field of view. It can hold two ABS (acrylonitrile butadiene styrene) filters, which are simple to attach. A front exhalation valve lets you breathe normally.

General Specifications

Type	Half Mask
Colour	Black
