| MDIB-CC1      |            | Interconnect Board |
| Specification |            |                    |
| Version: 1    |            | Date: 30/08/2022   |
| Revision      |            |                    |
| 1             | 29/08/2022 | First Release.     |

| Board Features   |                                                             |
|------------------|-------------------------------------------------------------|
| Module Size      | 85.00 x 54.00 x 0.60 mm                                     |
| Pinout           | 40 way and 41 way for 0.3mm                                 |
| Multi Pitch List | 0.3, 0.5, 0.6, 0.62, 0.65, 0.7, 0.8, 0.845, 1.0, 1.27, 2.54 |

| Compatible Displays |                                                           |
|---------------------|-----------------------------------------------------------|
| Part Number         | Description                                               |
| Various Displays    | Any display that has a matching pitch and number of pins. |

| Interconnect Board Description                                                                                                  |
|---------------------------------------------------------------------------------------------------------------------------------|
| Description                                                                                                                     |
| The MDIB-CC1 is a interconnect board for standard pitch pinouts to fine pitch wires. Ideal for prototyping of TFT and COG LCDs. |
