EXPERT 55

The EXPERT 55 pack is designed to organize and transport equipment for team rescue operations, everyday rope access work, or tree care. Padded contact zones provide a comfortable carry. A variety of pocket sizes and numerous equipment loops allow you to organize and secure your equipment. Multiple access points make it quick and easy to find what you need. It can also be opened entirely and laid flat when preparing for a job. Designed for intensive use, its durable construction includes TPU material and a welded base with reinforced fabric.

Shoulder straps, back panel, and waistbelt are padded for comfort when carrying the pack.

The side flap can be used to protect the carry zone (shoulder straps, back panel, and waistbelt) when the pack is being hauled, suspended, or laid on the ground.

Side panel and top pocket allows quick and easy access to a section of equipment.

The pack can be partially or completely opened based on the equipment needed.

Short Description Pack for organizing equipment, opens completely flat 55 liters

Selling Points

- Comfort and ease of use:
 - Padded shoulder straps, back panel, and waistbelt provide comfort while carrying
 - Shoulder, waistbelt and chest straps can be adjusted for a more custom fit
 - Waistbelt can be tucked into the lower back panel when not in use
 - Chest strap can be removed
 - Can be carried with the shoulder straps or by one of the three handles
 - Pack can be hauled or suspended using the top handle, which can support a load up to 50 kg
 - Side flap with reinforced fabric can be used to protect the carry zone (shoulder straps, back panel, and waistbelt) when the pack is being hauled, suspended, or laid on the ground
- Equipment organization:
 - Seven different pocket sizes to organize equipment based on size
 - Sixteen equipment loops to attach and secure metal equipment, for example
 - Central webbing to secure everything in place
 - Top pocket with window for packing a helmet, for example
- Easy access with different compartments:
 - Main compartment can be completely opened to access all equipment, or partially opened via two fastening buckles
 - Side panel can be opened independently to quickly access five equipment loops
 - Top pocket allows access to a helmet or any other equipment you prefer to keep isolated
 - Small front pocket can be used to store small personal items, such as keys
- Durable construction for intensive use:
 - High-strength TPU (PVC-free) material in areas most exposed to wear, for regular to intensive use; resistant to UV exposure (doesn't fade), to oil, grease, and high and low temperatures, and chlorine-free (no odor)
 - Reinforced fabric in areas with less exposure to wear, for a balance between low weight and rigidity
 - Welded base for abrasion and tear resistance
- Available in two colors (yellow/black or black)

Specification

- Volume: 55 liters
 - Dimensions: 75 x 35 x 24cm
 - Weight: 2760g
 - Maximum load: 50kg
 - Material(s): TPU (no PVC), polyester, nylon, EVA, EPE, aluminum
-
