RI-46 Series Dry Reed Switch

RI-46 Series

The switch is of the double-ended type and may be actuated by an electromagnet, a permanent magnet or a combination of both. The device is intended for use in relays, sensors, pulse counters or similar devices.

RI-46 Series Features
- Can switch main voltage
- Can handle up to 40 W load
- Contact layers: gold, sputtered ruthenium
- Superior glass-to-metal seal and blade alignment
- Excellent life expectancy and reliability
- RoHS Compliant

Dimensions for RI-46 Series

All Dimension in inches (mm) nominal

General data for all models RI-46

AT-Customization / Performed Leads
Besides the standard models, customized products can also be supplied offering the following options:
• Operate and release ranges to customer specification
• Cropped and/or performed leads

Coils
All characteristics are measured using the Philips Standard Coil. For definitions of the Philips Standard Coil, refer to "Application Notes" in the Reed Switch Technical & Application Information Section of this catalog.

Life expectancy and reliability
The life expectancy data given below are valid for a coil energized at 1.5 times the published maximum operate value for each type in the RI-46 series.

No load conditions (operating frequency: 100Hz)
Life expectancy: min. $10^4$ operations with a failure rate of less than $10^{-9}$ with a confidence level of 90%.
End of life criteria:
- Contact resistance > 1Ω after 2 ms

Loaded conditions (resistive load: 20 V; 500 mA; operating frequency: 125 Hz)

RI-46AA
Life expectancy: min. $10^7$ operations with a failure rate of less than $10^{-8}$ with a confidence level of 90%.
End of life criteria:
- Contact resistance > 2Ω after 2.5 ms
- Release time > 2.5 ms (latching or contact sticking).

RI-46A; RI-46B; RI-46C
Life expectancy: min. $2.5 \times 10^7$ operations with a failure rate of less than $10^{-8}$ with a confidence level of 90%.
End of life criteria:
- Contact resistance > 2Ω after 2.5 ms
- Release time > 2.5 ms (latching or contact sticking).

Mechanical Data
Contact arrangement is normally open; lead finish is...

</table>

- **Soldering**
  The switch can withstand soldering heat in accordance with “IEC 68-2-20”, test Tb, method 1B: solder bath at 350 ± 10°C for 3.5 ± 0.5 s. Solderability is tested in accordance with “IEC 68-2-20” test Ta, method 3: solder globule temperature 235°C; ageing 1b: 4 hours steam.

- **Welding**
  The leads can be welded.

- **Mounting**
  The leads should not be bent closer than 1 mm to the glass-to-metal seals. Stress on the seals should be avoided.

Care must be taken to prevent stray magnetic fields from influencing the operating and measuring conditions.

- **Mechanical Strength**
  The robustness of the terminations is tested in accordance with “IEC 68-2-21”, test Ua1 (load 40 N).

- **Operating and Storage Temperature**
  Operating ambient temperature; min: -55°C; max: +125°C. Storage temperature; min: -55°C; max: +125°C.

  Note: Temperature excursions up to 150°C may be permissible. For more information contact your nearest Comus Group sales office.

- **Shock**
The switches are tested in accordance with “IEC 68-2-27”, test Ea (peak acceleration 500 G, half sinewave; duration 11 ms). Such a shock will not cause an open switch (no magnetic field present) to close, nor a switch kept closed by an 80 AT coil to open.

- **Vibration**
The switches are tested in accordance with “IEC 68-2-6”, test Fc (acceleration 10G; below cross-over-frequency 57 to 62 Hz; amplitude 0.75 mm; frequency range 10 to 2000 Hz; duration 90 minutes.) Such a vibration will not cause an open switch (no magnetic field present) to close, nor a switch kept closed by an 80 AT coil to open.

- **Soldering**
  As part of the company policy of continued product improvement, specifications may change without notice. Our sales office will be pleased to help you with the latest information on this product range and the details of our full design and manufacturing service. All products are supplied to our standard conditions of sale unless otherwise agreed in writing.

Tinned; net mass is approximately 280mg; and can be mounted in any position.
