

Complete Wi-Fi Spectrum Analysis for Reliable Networks

The **Spectrum Bundle** is your ultimate tool for mastering spectrum analysis. Gain real-time visibility into your **2.4 GHz, 5 GHz and 6 GHz (Wi-Fi 6E)** networks, pinpoint interference sources, monitor channel saturation, and detect even the most elusive intermittent issues. With professional-grade tools for analysis and reporting, you'll have everything you need to optimize network performance and ensure reliable coverage.

What's included in the Spectrum Bundle

Order No. **OS-BUN-SPECTRUM**

Wi-Spy Lucid

Your trusty tri-band spectrum analyzer

Wi-Spy Lucid Spectrum Analyzer:

A tri-band spectrum analyzer for advanced RF analysis across 2.4 GHz, 5 GHz and 6 GHz bands.

Interference Finder

A Dual-band directional antenna

Interference Finder Antenna for Wi-Spy:

A directional antenna to pinpoint interference sources.

Chanalyzer

Spectrum analyzer software

Chanalyzer 5 Software with Report Builder:

Real-time visualization and reporting tools for seamless analysis.

MetaCare – 1 Year

Software updates and peace of mind

1 Year of MetaCare Support for Software:

Stay up to date with expert support and software updates.

Why you'll love it

- **Precision Meets Simplicity:**

Advanced tools that are easy to use, even if you're not a spectrum analysis expert.

- **One-Stop Solution:**

Everything you need to monitor, troubleshoot and optimize your Wi-Fi in one bundle.

- **For the Pros and Enthusiasts:**

Whether you're an IT pro or just love a good Wi-Fi optimization project: this bundle delivers.

- **Seamless Integration:**

Designed to work together effortlessly for a frustration-free experience.

- **The Spectrum Bundle isn't just a toolkit –**

it's your secret weapon for mastering Wi-Fi troubleshooting and optimization. With cutting-edge tools and an intuitive design, it's perfect for professionals who want to work smarter, not harder.

Why choose the Spectrum Bundle?

- **Advanced Tri-Band Spectrum Analysis**

Wi-Spy Lucid gives you full visibility into 2.4 GHz, 5 GHz and 6 GHz (Wi-Fi 6E) bands, monitoring both Wi-Fi and non-Wi-Fi activity with pinpoint precision. Paired with Chanalyzer's visualization tools, it's like putting on glasses after years of squinting – you'll finally see your network clearly in real time.

- **Pinpoint and Eliminate Interference**

With the Interference Finder Antenna, you're not just looking for interference – you're hunting it down. This directional antenna focuses your efforts, helping you zero in on the exact source of disruptions (goodbye, mystery microwave) so you can take action.

- **Monitor Channel Saturation and Intermittent Issues**

Chanalyzer doesn't just show you a list of access points; it gives you the full RF story. By combining Wi-Spy Lucid's insights with AP data, you can analyze channel usage, manage congestion and finally track down those annoying, intermittent interference gremlins.

- **Identify and Fix Wi-Fi Dead Spots**

Nobody likes a Wi-Fi dead zone. Whether you're planning a new network or keeping an existing one running smoothly, Chanalyzer's tools let you map SSID signal strength and spot gaps in coverage. The result? Seamless connectivity and happier users.

- **Effortless Reporting for Clear Communication**

Turn your findings into reports that don't just inform – they impress. With Report Builder, you can quickly add snapshots, tables and descriptions to create visually compelling PDFs that even your boss (or clients) will understand.
