

## WIRELESS KEYPAD AND CALCULATOR FUNCTION

### **Wireless USB numeric keypad with calculator**

This numeric keypad with calculator connects to your computer using a mini USB key equipped with a 27 MHz HF radio receiver. It also features an LR03-type battery that can be recharged using a USB cable.

It is your laptop's ideal companion due to its Num-Lock function (not synchronised with the computer), which allows you to use and enter numbers while retaining all standard keyboard functions.

The calculator allows you to switch from numeric keypad mode to calculation mode, and features a currency conversion function (euro / French Francs) as well as a VAT calculation function (inclusive / exclusive of VAT).

It is also possible to send calculation results to your computer, in order to recover these figures without having to retype them.

Membrane contact keys.

Keys are comfortable to use (Soft Touch).

Wireless radio connection with USB key receiver.

Battery is recharged via USB connection using a retractable cord (included).

Standby function to save battery charge.

Unsynchronised num-lock function enabling use of direction keys on the numeric keypad.  
Calculator function features 12-digit display, currency conversion, VAT calculation.
