TSN 212 A

V-ring seal

V-ring seals consist of a V-ring and a sheet steel sealing washer with a vulcanized rubber lip. The rubber lip fits into the seal groove in the housing. The washer is protected against corrosion. The seals are used to protect bearings from contamination or as secondary seals to protect primary seals in highly contaminated environments. They are a cost-effective and easy to install contaminant barrier for all kind of shafts. They are available in nitrile rubber. When ordering, please note that one item (seal pack) contains two seals.

- Easy to install
- Many variants
- Cost-effective

Overview

Dimensions

Shaft diameter	70 mm
Housing groove diameter	95.5 mm
Width	10.5 mm

Properties

Accessory type	Housing seal
Sealing type	V-ring
Material	Nitrile rubber with steel element

Logistics

Product net weight	0.08 kg
eClass code	23-05-17-90
UNSPSC code	31171519

Technical specification

Material	Nitrile rubber with steel element
