

BETA 5000 RSC50 2.0/CTR LED strip controller, with RF remote control, for workshop equipment combination

Certifications and Standards

Features

The LED strip controller allows the brightness of LED strips to be adjusted remotely using the handy RF remote control.

CONVENIENCE

With the RF radio-frequency remote control, you have complete control of the LED strips: switching on, switching off and dimming is quick and easy.

SIMPLICITY

Quick and easy connection of LED strips thanks to mini receiver.

MEMORY RETENTION

The LED strip will always remember all preferences: on/off and intensity remain unchanged even after switching off.
