

WD 3000HPT - Soldering Station Set

Order No.:0053373699

Soldering Station, Digital, 420 W, 230 V, with High-Power Soldering Pencil WP 120 (120 V), Micro Soldering Pencil WMRP (40 W) and Micro Tweezers WMRT (2 x 40 W)

The Weller® WD 3000HPT is a versatile unit for use in industrial, production, engineering, repair and laboratory applications to carry out professional soldering work on electronic assemblies using the latest technology. The WD 3000HPT enables the combined use of Weller's new High-Power irons up to 120 W and Micro tools up to 80 W to handle modern HF shielded and SMT-flooded electronics.

Top Attributes

- Microprocessorcontrolled soldering station in a modern ergonomic design for Weller soldering tools up to 200 W
- Temperature control 50°C - 450°C
- Big LC display
- Three fixed temperatures can be assigned with the temperature buttons
- WP 120 HighPower soldering pencil für HF shieldings, micro tool for handling small and sensitive SMT components
- Three channel with HighSpeedRegulation for all micro tools and the HighPower WP 120 soldering pencil

Technical Data

Display technology	LC
Equipotential Bonding/ hard grounding explanation	Normal state
Temperatur control comment	Button
Display included & Size	Large
Display information content	High
ESD safe	Yes
Equipotential Bonding/ hard grounding	Yes
Display backlight	No
Antistatic housing	Yes
Temperature stability	59
Power unit wattage	420 W
Mains supply Voltage	230 V
Power supply frequency	50 Hz

Temperature accuracy	917
Temperature regulation	50 - 450 °C

Packaging information

Shelf pack size (Units per shelf pack)	1
--	---
