

New 3D COVID-19 Signs

Make your floor signs stand out!

Make your social distancing identification stand out with a 3D floor sign. This eye-catching design keeps everyone informed of proper spacing for social distancing.

Safety communication is an important aspect in reducing the spread of COVID-19.

Traditionally, floor signs and tape have been the best way to display safety communication and Brady offers a comprehensive product mix in this crowded market space. The most popular floor sign is a circular shape with a safety message. Brady has made this popular floor sign much more effective in communicating with users.

So, welcome to 3D floor signs!

Main material (B-7549)

B-7549 is a new material - a removable, repositionable vinyl that can be moved and re-applied, quickly and easily, without leaving any marks.

- Easy and fast application and removability thanks to a dotted adhesive
- Bubble-free application
- No water or application tools needed
- Good adhesion to smooth surfaces, but also sticks on carpets and other delicate surfaces
- Suited for short-term indoor applications

B-7549 is not laminated!

B-7549 provides limited abrasion resistance.

Custom option for other materials

3D signs can be offered as a custom option in other, more permanent sign materials. All 3D signs can be supplied with custom text.
