Voice macros and templates speed you through repetitive tasks

IBM ViaVoice™ is tailored to meet the needs of anyone, from a first-time speech software user to advanced computer pros

IBM ViaVoice Millennium family of products

IBM ViaVoice Millennium is the IBM award-winning family of speech recognition software for the desktop, including the first continuous speech recognition product for the Mac computer. With an extensive Microsoft Windows and Apple Macintosh product line, IBM ViaVoice presents speech recognition solutions to meet an individual user's needs.

Based on 30 years of leadership in speech recognition research and development, IBM ViaVoice technology is helping transform the way humans interact with their computers. With IBM ViaVoice Millennium, users can create text using natural, continuous speech. It's the easy, powerful and productive way to communicate with the PC.

Available around the world in over 10 languages, millions of users are talking instead of typing to boost their productivity while enjoying the ease of use that speech brings to the job. IBM ViaVoice Millennium products are available in several editions to provide specific speech solutions for users. The editions include IBM ViaVoice Pro, Web, Standard and Macintosh.

IBM ViaVoice Pro

IBM ViaVoice Millennium Pro is the most powerful, comprehensive and flexible IBM speech product. Speak directly into many popular Windows applications using natural, continuous speech. Use voice commands to control and navigate the desktop, applications and the Internet, naturally and easily. ViaVoice Pro also includes specialized vocabularies such as Business & Finance, Computer, Cuisine and Chatter's Jargon. Documents and e-mail can be proofread and played back using the IBM ViaVoice Text-To-Speech (TTS) feature, while edits and corrections to text can be made directly into supported applications. IBM ViaVoice Pro is ideal for experienced PC users.

IBM ViaVoice Web

Chat, create e-mail and send instant messages using IBM ViaVoice speech technology. With this fun product you can use voice commands to surf the Web, control your browser and dictate documents. IBM ViaVoice Chatter's Jargon vocabulary contains chat abbreviations and emoticons. ViaVoice Web is ideal for students and small office or home users.

IBM ViaVoice Standard

An excellent introduction to speech recognition, IBM ViaVoice Standard lets you perform fast text entry using continuous speech. Dictate naturally into IBM ViaVoice SpeakPad to create and edit documents.

IBM ViaVoice for Macintosh

The IBM ViaVoice award-winning continuous speech recognition product for the Macintosh learns as you speak, continually improving its accuracy. Speak naturally into IBM ViaVoice SpeakPad to create and edit documents, and then transfer the dictated text into popular Macintosh applications. You can also create and edit macros for frequently used text and phrases. IBM ViaVoice for Mac includes a lightweight, noise-cancelling microphone with an array of color inserts to match your iMac computer.

IBM ViaVoice Millennium Edition 1.0 for Macintosh computer was named "Best New Product" for the Mac Operating System at the 5th annual Apple Design Awards. The product was also chosen by the New York Times as one of its Top 10 Most Wanted business software titles.

Support

Product requirements and frequently asked questions and answers are provided for each IBM ViaVoice product. A list of tested systems, sound cards and microphones is also available. To view this information, visit ibm.com/software/speech/support.
