Product Description

Use this RS PRO digital power meter to measure the consumption of machinery, lighting or appliances. It covers a wide range of parameters, from total active energy (kWh) to instantaneous reactive power (kVArh), so there's no need for multiple parts.

With dual-pulsed outputs and built-in Modbus communication protocol, this meter will accommodate most requirements. It can be retrofitted and functions as a CT-operated meter. You can configure it to work with both single-phase and 3-phase applications.

The meter offers user-friendly menu navigation and set-up, with a back-lit digital display for easy reading. It complies with EN 61000-6-1: 2007 (LVD) on electromagnetic compatibility, EN 61000-6-3: 2007 on emissions for light industrial environments and EN 61010-1: 2010 (EMC) on safe measuring instruments.

The 871-8305 power monitor will measure and display electrical power quality parameters. It has been engineered to cover most applications (Single Phase and Three Phase networks / RS485 Modbus / Import and Export kWh), replacing the need for several different models of this power meter.

- Single & Three Phase
- · Import / Export kWh
- · Backlit Display
- High/Low Alarm Relays

The 871-8314 is produced to the highest quality and utilizes the latest microprocessor and technology. It has a blue backlit display and 16 different measuring parameters. This includes a negative power reading to indicate reversal of CT installation or connection. With built in pulsed outputs and RS485 Modbus RTU it is fully compatible for integration with BMS and remote monitoring systems.
