Product Description

RS PRO Transparent Polypropylene 12 Compartment Box, 30mm x 200mm x 110mm

Use this no compartment box from RS PRO to hold small components that might otherwise get lost in your workshop or factory. The transparent container is ideal for keeping items such as washers, rubber seals and nuts and bolts in one safe place. As there are no dividers inside the box, you can also use it to store larger items.

This container has reinforced corners and a handle made from sturdy polyvinyl chloride (PVC) to protect it from damage and warping. The lid can be locked closed to safeguard the box's contents from dust and dirt. Thanks to the transparent casing and lid, you can see what's inside without having to open the container.

The product is made from tough PP (polypropylene plastic), which means it's durable and hardwearing. It's ideal for storing items at home as well as in commercial environments.
