Heatsink Transistor Spring Clip For Use With TO-220

Product Details

Transistor Spring Clips

Transistor spring clips designed for single point fixing of power transistors such as TO220, TO218, TO247 and TO3P to their heatsinks

They provide strong central pressure (max. 7.5kg) to maximise the thermal transfer properties to the heatsink with only one circular hole required for two transistors

Suitable for any heatsink panel or pad thickness

Zinc plated with clear passivated finish - Isolation voltage 1000V

Transistor & Heatsink (Accessories)

ENGLISH

Specifications

Accessory Type	Gull Wing Clip
For Use With	TO-220
