Accessories & support available at
storageoptions.com

Scroll Excel is a portable, capacitive touch-screen Android™ 4.0 tablet made especially for internet browsing, social networking, games, videos and an almost limitless number of other applications.

Equipped with the latest, powerful hardware and an intuitive, capacitive touch-screen, Scroll Excel is a highly capable tablet. A Cortex A8 1.2GHz CPU and 512MB RAM ensures Scroll Excel can handle everything that is asked of it, including Flash content for a richer online experience.

Scroll Excel's party-piece is its ability to output 3D content to your 3D TV or monitor. This means 3D content can be downloaded to your Scroll Excel and played back on your big screen (via a mini high-speed HDMI cable) without the need for a separate playback device. Scroll Excel can also output standard 1080p HD content in the same manner.

Features and Benefits

- Android™ 4.0 Tablet
- Intuitive, Capacitive Touch-Screen
- Limitless Possibilities
Web, Games, E-Books, Video & More
- Fast Hardware
