RS Pro LED RGB Light Controller

RS Stock No: 136-3593

Features

Radio-frequency touch remote control for total control from RS Pro, RGB multi-coloured strip LED system. It can control up to 4 RGB / CTR-PRO controller-receiver independently. Innovative, its touch colour selector offers a wider range of hues. Also allows adjustment of light intensity and offers a fade mode.

Very practical in the context of a domestic use, this remote control also finds its place in professional environment for the control of rooms of meeting, offices, a room of restaurant or a shop.

Its range of 10 meters and its system of keys "Sensitive" offer an optimal comfort.

Its installation is done in a few moments thanks to its function of automatic pairing.
