

1477/C38

Kit with swivel ratcheting wrench, with short socket for belt tighteners

Beta's assortment 1477/C38, your partner for accurate tightening jobs on belt tighteners and engine parts. The 500-mm long ratchet lever, with central joint, allows the ideal angle to be determined, thereby making jobs easier. The short sockets, available with several different heads, fit small spaces perfectly. Hence no additional parts must be removed.

Kit contents:
