1.7mm pitch, Low Profile Wire-to-Board Connectors for Power Supplies

DF65 Series

(UL, C-UL, Listed)

Features

1. Enhanced contact reliability and lock structure
   The unique locking structure reinforces the engagement between the wire side portion and the header. This prevents the wire side from becoming misaligned due to stress from poorly routed wiring. (Fig.1) (Patented)

2. Vertical mating provides superior handling
   The use of vertical mating style reduces assembly time and maximizes precious board space which gives designers more freedom when designing other components on the PCB. (Fig.2)

3. Highly reliable contact structure
   The two point contact structure provides optimum reliability, a low mated height of 1.8mm and an effective mating length of 0.35mm.

4. Increased cable retention
   The header is designed to press the terminal lance down during the mating operation; this prevents the lance from moving and enhances its strength.

5. High current of MAX 4A (24 AWG)
   By utilizing highly conductive material for the female terminals and suppressing the contact resistance, the DF65 series can handle a maximum of 4A with 24 AWG wire.

6. Solder wicking prevention
   Molding is done in a way that removes the gap between the contacts and the housing to prevent wicking.

7. Prevents Accidental unmating
   The molded structure is designed to prevent accidental unmating due to poorly routed wiring and harsh loads.

8. UL and C-UL Certified

In cases where the application will demand a high level of reliability, such as automotive, please contact a company representative for further information.

**UL/C-UL/File No. and Recognition No.**

- UL: E52653
- C-UL: E52653

**Item Specifications Conditions**

1. **Insulation resistance**
   - 100MΩ min.
   - Measured at DC 100V

2. **Withstand voltage**
   - No flashover or breakdown
   - AC 500V is applied for one minute.

3. **Contact resistance**
   - 10mΩ max.
   - Measured at 1mA and no higher than 20mV

4. **Vibration Resistance**
   - No electrical discontinuity for more than 1μs
   - 10 cycles in each of three directions at frequency 10-55 Hz, half amplitude 0.75mm

5. **Shock Resistance**
   - No electrical discontinuity for more than 1μs
   - Accelerated velocity: 490m/s², for 11 ms, half-sine in 3 directions, 3 times for each of the three directions

6. **Moisture-resistance**
   - Contact resistance: 20mΩ max.
   - Insulation resistance: 500MΩ min.
   - Temperature: 40 ±2°C; humidity: 90 to 95%, left as it is for 96 hours

7. **Temperature cycles**
   - Contact resistance: 20mΩ max.
   - Insulation resistance: 500MΩ min.
   - -55°C: 30 minutes → 5 - 35°C: 2 - 3 minutes → 85°C: 30 minutes → 5 - 35°C: 2 - 3 minutes
   - 5 cycles

8. **Durability**
   - Contact resistance: 20mΩ max.
   - Tin plated: 30 mating cycles
   - Gold plated: 50 mating cycles

9. **Resistance to solder heat**
   - The resin components will not become deformed or lose performance due to deformities
   - Reflow: according to the recommended temperature profile
   - Hand soldering: temperature of soldering iron at 350°C±10°C for 3 seconds

**Note 1**: This is the maximum current rating while all pins are powered or used as all power lines. Depending on pin assignment, more current may flow. When dividing the current more than the specified amount into multiple circuits, the actual current value may exceed the rated value. Please contact Hirose Electric, for inquiries on the assignment of pins and on the currents that can be delivered.

**Note 2**: Includes the temperature rise of power lines.

**Note 3**: Use without condensation on parts.

**Note 4**: The storage condition refers to long-term storage of the product on the shelf before assembly. Please use the operating temperature for temporary storage such as pre-assembly and during shipping.

**Product Number Structure**

Refer to the chart below when determining the product specifications from the product number. Please select from the product numbers listed in this catalog when placing orders.

**Header connector**

DF 65 - *P - 1.7 V

- **Series Name**: DF
- **Series No.**: 65
- **Number of contacts**: 3, 4, 5, 6, 7
- **Connector type**: P : Header
- **Pitch**: 1.7mm

**Socket connector**

DF 65 - *S - 1.7 C

- **Series Name**: DF
- **Series No.**: 65
- **Number of contacts**: 3, 4, 5, 6, 7
- **Connector type**: S : socket
- **Pitch**: 1.7mm
- **Termination form**: C : crimp case

**Crimp contact**

DF 65 - 2428 SCF

- **Applicable wire size**: 2428: 24 to 28 AWG
- **Packaging style**: SCF : Socket contact-Reel-Tin plated
- **SCFA**: Socket contact-Reel-Gold plated

Note 1: Hirose does not cover damage created by the use of unapproved Hirose Tools. Please contact your local Hirose Sales for clarification.

Note 2: Please conduct crimping work according to the "Crimping work standards" and "Crimping condition table".

Note 3: The compatible wire is limited to UL10368, 24 to 28 AWG.

### Precautionary Notes

#### 1. Recommended Soldering Profile
   (Compatible with lead-free soldering)

   **[Applicable Conditions]**
   1. Peak temperature: MAX 250°C
   2. Heating Area: 220°C or above, within 60 sec.

   Measurement is conducted at the contact lead part.
   Please check the mounting conditions before use, conditions such as solder paste types, manufacturer, PCB size and any other soldering materials may alter the performance of such materials.

   (Note 1) This temperature profile is a recommended value only; please contact your Hirose Sales Rep for more information.

#### 2. Recommended hand soldering conditions

   Temperature of soldering iron: 350±10°C, soldering time: no more than 3 seconds

#### 3. Recommended screen thickness, aperture ratio (pattern surface ratio)

   Thickness: 0.1 mm, aperture opening ratio: 100%

#### 4. Warping of PC Board

   A maximum of 0.02 mm at the center of the connector, as measured from either end of the connector.

#### 5. Cleaning Conditions

   IPA cleaning is allowed. (Cleaning is not recommended because cleaning may change the push/pull feeling etc. Please contact your local Hirose representative prior to the use of any cleaning agents.)

#### 6. Precautions

- When inserting the crimp contact into the crimp socket, do not insert it at a slanted angle to maintain the reliability of its performance.
- Please use caution when mating/unmating this connector if it has not been mounted onto the PCB, doing so could deform or damage the contacts.
- Do not pull on the wires of this connector as this may cause damage to the connector.
- During the hand soldering process, make sure not to apply too much flux. Doing so may cause a solder wicking problem.
- This product may experience some differences in color from one production lot to another. This color difference does not influence the performance of the connector.
- For handling precautions to be used during the insertion/removal process, please refer to the "DF65 Push-pull procedure" (ETAD-H0803).
- For the assembly procedure and the instruction manual, please refer to the "DF65 Cable Assembly Procedure" (ETAD-H0736).
7. Mating and Unmating Operation

**Mating operation**

1. Align the receptacle over the header

2. Insert and press down on the receptacle in the direction of the arrow.

3. Completed mating operation

**Unmating operation**

1. Start by lifting up on the front edge of the receptacle.

2. Pull it upward to release the friction fit lock portion.

3. Reinforced lock portion will then be released. Continue lifting the receptacle in an upward direction.

The characteristics and the specifications contained herein are for reference purpose. Please refer to the latest customer drawings prior to use. Contents are subject to change without notice for the purpose of improvements.
