- Product training schedule \& locations
- Advertising \& trade show schedules
- Press releases \& FA0s

## Enabling "Dead Man" Switches

## What is an enabling switch?

An enabling switch is a 3-position (OFF-ON-OFF) switch to allow a machine operation only when the switch is lightly pressed and held in the middle position (position 2). Because it disables machine operation when released (position 1) or further depressed (position 3) by a panicked operator, the safety of operators is ensured.

Because operators use pendants in hazardous environments performing teaching, system changeover, and maintenance of robots, they must have protection against unpredictable motion of robots, and therefore teach pendants are equipped with 3 -position enabling switches.

Selection Guide
Enabling Switches

| Series Model | HE1B | HE2B | HE3B | HE5B | HE1G |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Appearance |  |  |  |  |  |
| Page | 404 | 407 | 410 | 413 | 416 |
| Description | Basic Switch | Redundant Basic Switch | 16 mm Panel Mount | 16 mm Round Enabling Switch | Grip Switch |
| Maximum Contacts | 1NO | DPDT/DPDT, 2NC/DPDT, 4NC | DPDT | DPDT | DPDT, 1NC/DPDT, 2NC |

Application Example

## HE1B Enabling Switch Movement

3 Position Enabling Switch
Position 1 - Normal position - Contact Open Position 2 - Push half way - Contact Closed Position 3 - Push all the way - Contact Open

When releasing switch from position 3 back to position 1, the switch will not enter the ON state.

## HE1B Series Basic Enabling Switch

## HE1B Key features include:

- 3 position funtionality (OFF - ON -OFF) as required for manual robotic control
- Ideally suited for use as enabling (aka "deadman") switch on teach pendants
- Provides a high level of safety based on human behavioral studies that determine personnel may squeeze OR let go when presented with a panic situation
- Positive action contacts "On" (pos. 2) to "Off" (pos. 3) ensure no contact welding (per EN60947-5-1 / IEC60947-5-1)
- Contacts will not close when released from "Off" (pos. 3) to "Off" (pos. 1) (per IEC60204-1; 9.2.5.8)
- Small, lightweight and highly reliable

## Operating Characteristics

## Dimensions (mm)

Installation Dimensions (mm)
HE1B-M1 (Side Mounting)

1. M3 Screw (not provided)
2. Thread built in

## HE1B-M1N (Front Mounting)

1. M3 Screw (not provided)
2. Locking nut (2 pcs) included

## HE2B Series Redundant (Double) Basic Enabling Switch

## HE2B Key features include:

- 3 position funtionality (OFF - ON -OFF) as required for manual robotic control
- Ideally suited for use as enabling (aka "deadman") switch on teach pendants
- Provides a high level of safety based on human behavioral studies that determine personnel may squeeze OR let go when presented with a panic situation

- Snap acting contacts from Off $\rightarrow$ On $(1 \rightarrow 2)$
- Positive action contacts from $0 n \rightarrow 0 f f(2 \rightarrow 3)$ ensure no contact welding (per EN60947-5-1 / IEC60947-5-1)
- Contacts will not re-close when released from Off $\rightarrow$ On $(3 \rightarrow 1)$ (per IEC60204-1; 9.2.5.8)
- Multiple contacts for enhanced reliability
- Monitoring contacts in addition to main load contacts
- Available with or without rubber cover (cover provides IP65 watertight seal)

## HE5B Series Pushbutton Enabling Switch

## HE5B Key features include:

- Ergonomically-designed OFF-ON-OFF 3-position operation
- Easy recognition of position $1 \rightarrow 2$ transition, made possible by snap action switch
- Sufficient load difference is provided for shifting from position $2 \rightarrow 3$
- Light force needed to maintain position 2, so that operators can easily use the enabling switch
- The switch does not turn ON when being released from position 3 (OFF when pressed) to position 1 (OFF when released) (IEC60204-1, 9.2.5.8)
- Two contacts are provided for safety
- IP65 (using the waterproof rubber cover)
- Mounts in a $16 \mathrm{~mm}\left(5 / 8^{\prime \prime}\right)$ round hole

## HE1G Series Grip Style Enabling Switch

## HE5B Key features include:

- 3 position funtionality (Off - On - Off) as required for manual robotic control
- Ideally suited for use as an enabling (aka "deadman") switch for robotic cells
- Provides a high level of safety based on human behavioral studies that determine personnel may squeeze OR let go when presented with a panic situation
- Contacts will not re-close when released from Off $\rightarrow$ On (3 $\rightarrow$ 1) (per IEC60204-1; 9.2.5.8)
- Optional E-Stop switch built in
- Connection for conduit and cable strain relief built in
- IP66 waterproof sealing
- Meets ANSI RIA 15.06 robotics standards

- Optional momentary pushbutton or E-Stop built in

BG standard in Germany

## Operation Characteristics

: contact ON (closed) $\square$ contact OFF (open)
Terminals No. 1-2, $3-4,5-6$ will become positive action when moving from position 2 to 3
2. Use terminal contacts $1-2$ and $3-4$ for safest circuit.
3. When the center of the button is pressed, the above operation characteristics occur.

## General Information

## Safety Precautions

- In order to avoid electric shock or fire, turn power off before installation, removal, wire connection, maintenance or inspection of switch.
- Follow specification when installing. Improper electrical load may damage switch, cause electric shock, or fire.
- Use proper wire diameter to meet voltage and current requirements. Using improper wires or incomplete soldering may cause fire due to abnormal heat generation.
- If the panel is not level when mounting an enabling switch, the waterproof feature cannot be guaranteed.

## HE3B

- The rubber boot has a tab to be used for orientation. When making a positioning hole in a panel, do not make a hole in the rubber boot, or the waterproof feature cannot be guaranteed. When the positioning hole is not on the panel, remove the tab, but do not make a hole in the rubber boot.
- When tightening the locking ring, secure the flange to prevent the enabling switch from rotating. In applications where the enabling switch is to be rotated, mount the switch in a recess on the panel as shown.

## Wiring Precautions HE1B/HE2B/HE3B

- Applicable wire size is $0.5 \mathrm{~mm}^{2}$ (20AWG) (maximum) / 1 line.
- When soldering the terminal, solder at a temperature of $260^{\circ} \mathrm{C}$ within 3 seconds. Use non-corrosive liquid rosin as soldering flux.

## HE1G

- Wire Stripping Information
Wire Length
- Applicable Wire Size:0.14 to $1.5 \mathrm{~mm}^{2}$ (24-16AWG, one wire per terminal)

## Use Precautions <br> HE2B/HE3B/HE1G

- To ensure the highest level of reliability connect both contacts to a monitoring device such as a safety relay.
- Recommended Torque

|  | See Drawing Above | Recommended Torque |
| :---: | :---: | :---: |
| Rubber Boot \& Base | A | $1.2 \pm 0.1 \mathrm{Nm}$ |
| Connector \& Grip Switch | B | $4.0 \pm 0.3 \mathrm{Nm}$ |
| Connector | C | $4.0 \pm 0.3 \mathrm{Nm}$ |
| Terminal Screw | D | $0.5 \pm 0.6 \mathrm{Nm}$ |
| Do Not Remove | E |  |
