

Dremel 13mm Sanding Mandrels & Bands 50pc Variety Pack (771B-02)

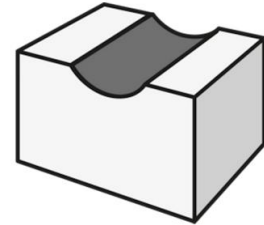

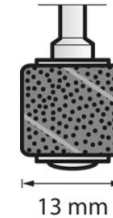

Accessory

Sanding

Versatile sanding band kit for shaping, smoothing, and surface prep

- 48 sanding bands on 3 grits (60, 120, 240) designed for a variety of applications
- Includes 2 mandrels for easy and secure band attachment
- From rough shaping to detailed finishing, these bands work effectively on wood, fiberglass, plastics, aluminium and steel

What can you do with it?

Effortlessly handle tasks like shaping wood, smoothing plastics, or removing rust from metal surfaces. These sanding bands are also perfect for fine-tuning rubber and other soft materials, giving you control over every detail of your project. • 2 x 430 Sanding Band 13 mm (60 Grit) including Mandrel – Great for removing material • 14 x 431 Sanding Band 13mm (60 Grit) – Perfect for tackling tougher surfaces and layers. • 16 x 438 Sanding Band 13mm (120 Grit) – Excellent for prepping wood, cleaning plaster, and achieving smooth finishes. • 16 x 446 Sanding Band 13mm (240 Grit) – Ideal for polishing and adding detailed touches to wood and painted surfaces.

How to Use.

Attach a sanding band to the 430 Sanding Drum Mandrel, secure it to your Dremel Multi-Tool, and select the appropriate speed for your material. Let the tool glide over the surface without pressing too hard for the best results. For added confidence, practice on scrap material before beginning your project.

Recommended speed (RPM).

- Hardwood & Softwood: 20,000–30,000 • Plastic: 15,000–20,000 • Aluminum & Steel: 15,000–25,000
