### 2. HAZARDS IDENTIFICATION

**Classification** Carcinogenic Category 3 R40, sensitizing R42/43, Xn R20/22, C R35,  
N R50-53

Limited evidence of a carcinogenic effect. Causes severe burns  
Harmful by inhalation and if swallowed. May cause sensitization by  
inhalation and skin contact. Very toxic to aquatic organisms, may cause  
long-term adverse effects in the aquatic environment.

**Further information**

The Nickel Metal Hydride is a sealed battery which is not hazardous when used  
according to stated guidelines.

Under normal conditions of use, the integrity of the battery casing and security  
vent are maintained, the ingredients are not expected to pose a significant risk to  
man nor the environment.

In extreme or adverse conditions (high over-charge, inverse charge, external short  
circuit), some electrolyte leakage can occur by the safety vent. In these cases, the risk is the  
caustic nature of electrolyte (potassium hydroxide).

The classification above is based on the contents being considered as a preparation in  
accordance with Directive 1999/45/EC
