Extra Flat Cable for EcoFlow Additional Battery

DETAILED SPECIFICATIONS

The **EcoFlow Extra Flat Battery Cable** is designed to seamlessly connect the **DELTA Pro 3** to a **DELTA Pro 3** or **DELTA Pro Extra Battery**. This robust and reliable cable ensures safe and efficient power transfer, allowing you to easily expand your system's capacity without interruptions.

MAIN FEATURES

- **Compatibility:** Designed specifically for **DELTA Pro** and **DELTA Pro 3** models .
- **Length:** Available in two lengths to suit your installation needs:
 - 0.85 meters
 - 2 meters
- **Design:** The extra-flat design of the cable makes it easy to install, especially in tight spaces or for configurations requiring increased flexibility.

BENEFITS

- **Simplified installation:** Thanks to its extra-flat design, the cable can be easily installed under windows or doors, thus avoiding the need to drill into walls.
- **Capacity expansion:** Allows you to easily add extra batteries to your **DELTA Pro** system, increasing the available energy capacity.
- **Reliability:** Ensures safe and efficient energy transfer between connected units.

COMPATIBILITY

This cable is compatible with the following products:

- **DELTA Pro 3**
- **DELTA Pro 3 Additional Battery**
- **DELTA Pro Additional Battery**

REMARKS

- This cable is designed specifically for connections between the DELTA Pro (or DELTA Pro 3) and their corresponding additional batteries.
- It is recommended to check the compatibility of this cable with your specific configuration before purchasing.
