

Datasheet

1/2" Drive Torque Limited Impact Socket Set

The 3 Piece 1/2" Torque Limited Impact Socket Set has a unique clutch design incorporating a teathed spring load mechanism prevents wheel nuts and fasteners being tightened beyond a torque of 100 Nm.

This irradiates the potential for spraining or damaging of wheel nuts during tyre changing. Protective plastic sleeve also prevents scratches and damage to expensive alloy wheels.

- Chrome Molybdenum Material
- For use with 1/2" impact wrenches
- Standard passenger car wheel nut sizes
- Suitable for use with alloy wheels
- Plastic presentation case

SPECIFICATIONS

Drive size	1/2 in
Socket type	Hexagon
Socket size (mm)	17, 19, 21 mm
Material	Chrome Molybdenum Steel
