

Thank you for purchasing the Adaptive® CyCLO ADC-48-450-U temperature controller.

Developed to work with Adaptive® thermoelectric assemblies and thermoelectric cooler (TEC) modules, CyCLO is an electronic PCB servo controlled pulse width modulator (PWM) controller that enables a precise method of temperature control for sensitive engineered solutions.

The controller is capable of operating in a standalone mode, it is also supported by user-friendly PC software.

Designed and manufactured in the UK.

Getting Started

Visit www.AdaptiveTE.com/downloads to access the latest Windows-based Adaptive® HMI software and user guides.
