

16 March 2017

Dear Customer,

Rockwell Automation is committed to demonstrating the highest standard of global environmental management. We embrace this as a core value and an integral part of all operations and seek continual improvement of our environmental management system and performance. Our dedication is demonstrated by our compliance efforts as they apply to the European Restriction of Hazardous Substances (RoHS) Directive (2011/65/EU).

The RoHS Directive restricts the use of six hazardous substances in electrical and electronic equipment. **Rockwell Automation products currently required to comply with RoHS are Category 3 products (IT and telecommunications equipment) such as industrial computers, monitors, and accessories. Rockwell Automation Category 3 products that fall within the scope of the RoHS Directive are fully compliant with the material restrictions, conformity assessment and CE-marking requirements of the Directive.**

Furthermore, Rockwell Automation's goal is to meet the RoHS material restrictions, conformity assessment and CE-marking requirements for all of our Category 9 products (*industrial* monitoring and control instruments) prior to the mandatory date of 22 July 2017 set out in the RoHS Directive recast (2011/65/EU).

In response to your request, below is the RoHS-status for specific products.

Catalog Number	Product Description	Status	Date of Manufacture for Meeting RoHS Material Restrictions
1784-SD1	ControlLogix Secure Digital Card	Meets EU-RoHS material restrictions	June 2014
