

10504

### Application

Kaetra enclosures are manufactured using an insulating, self extinguishing material. Suitable for commercial, industrial and domestic applications, for installation indoors and outdoors in harsh environments, ie marinas.

- **Degree of protection:** IP65
- **Colour:** light grey (RAL 7035)

These enclosures are supplied complete with the following:

- 1 built-in dividable blanking plate
- 1 marker strip
- 4 sealing plugs for wall mounting screws (essential for class 2)
- 1 angled terminal block support to simplify cable insertion and improve accessibility on clamping
- **1 terminal block fitted with a guide to simplify cable introduction in the tunnels:**
  - 13441 to 13443, two terminals of 4 holes
  - 13444 two terminals of 8 holes

### Supplied with transparent door

| Part N°. | Capacity in 18mm SP ways | N°. of rows | Dimensions in mm |       | Depth |
|----------|--------------------------|-------------|------------------|-------|-------|
|          |                          |             | Height           | Width |       |
| 13441    | 4                        | 1           | 200              | 123   | 112   |
| 13442    | 6                        | 1           | 200              | 159   | 112   |
| 13443    | 8                        | 1           | 200              | 195   | 112   |
| 13444    | 12                       | 1           | 200              | 267   | 112   |

Suitable for most DIN standard devices

### Additional accessories

| Description  | Part N°.                       |                         |
|--|--------------------------------|-------------------------|
| 80A terminal block, 4 holes                                  | 13575                          |                         |
| 80A terminal block, 8 holes                                  | 13576                          |                         |
| 80A terminal block, 16 holes                                 | 13577                          |                         |
| 80A terminal block 22 holes                                  | 13578                          |                         |
| Angled terminal block supports 4 way enclosure               | 13361                          |                         |
| Angled terminal block supports 6 way enclosure               | 13362                          |                         |
| Angled terminal block supports 8 way enclosure               | 13363                          |                         |
| Angled terminal block supports 12 way enclosure              | 13364                          |                         |
