

COMPACT TOOL BOX | TB-B1-B-60C

The ToughBuilt® StackTech® Compact Tool Box is engineered for Pros to build a system unlike any other and customise it to the needs of every trade.

The StackTech Compact Tool Box is a modular option for layered organisation. It features an intuitive self-aligning top that allows StackTech boxes and totes to virtually stack themselves. An auto-locking interface ensures boxes seat securely, lock into place for transport, and easily unlock with a slide of the switch. A prominent lock indicator lets you know your Stack is safe to move without second guessing. Accessing tools is simple and intuitive with a one-handed center latch, standard to every size tool box and organiser. Inside, you'll find an inner tray and five dividers to help Pros stay organised and partition their space. Full customisation is at Pros fingertips with tool-free, quick-release steel accessory rails. StackTech Compact Tool Box is built for high-impact durability with armored corners and IP65 dust and water protection to ensure it can handle the toughest conditions. A single locking point secures tools on and off the jobsite.
