- Integrated 2 MPx wide-angle camera with day-night function
- Live view of selected ABUS IP cameras
- Intuitive control via 7" touchscreen monitor (up to 6 monitors per intercom set)
- With intercom functionality, door opener, video display, message recording, automatic response, etc.
- Reliable control of the entrance area
- Additional manipulation protection with optional accessories

The ABUS door intercom combines the door bell, access control, intercom function, and video surveillance of the entrance area in the form of a classic door station. Door station plus professional surveillance cameras. The 2 MPx door station camera with 155° wide-angle lens and integrated IR-LEDs provides conclusive live images both day and night. In addition, compatible ABUS IP cameras can be integrated and the live images can be displayed on up to 6 touchscreen monitors. Modern and secure system for single-family homes. ABUS' 2-wire door station stands for reliable communication at your door – fail safe and interference proof – with easy installation. This is why it is the right choice for both new construction and upgrades. The scope of delivery of the complete set consists of the door station, 2-wire video/audio distributor, and a 7" touchscreen monitor. Optional accessories include the security module – for additional manipulation protection – as well as the robust stainless steel installation box for on-wall mounting.
