Disclaimer

All information in this document is current as of its creation. The contents of this document are subject to change without notice. B&R Industrial Automation GmbH assumes unlimited liability in particular for technical or editorial errors in this document only (i) in the event of gross negligence or (ii) for culpably inflicted personal injury. Beyond that, liability is excluded to the extent permitted by law. Liability in cases in which the law stipulates mandatory unlimited liability (such as product liability) remains unaffected. Liability for indirect damage, consequential damage, business interruption, loss of profit or loss of information and data is excluded, in particular for damage that is directly or indirectly attributable to the delivery, performance and use of this material.

B&R Industrial Automation GmbH notes that the software and hardware designations and brand names of the respective companies used in this document are subject to general trademark, brand or patent protection.

Hardware and software from third-party suppliers referenced in this document is subject exclusively to the respective terms of use of these third-party providers. B&R Industrial Automation GmbH assumes no liability in this regard. Any recommendations made by B&R Industrial Automation GmbH are not contractual content, but merely non-binding information for which no liability is assumed. When using hardware and software from third-party suppliers, the relevant user documentation of these third-party suppliers must additionally be consulted and, in particular, the safety guidelines and technical specifications contained therein must be observed. The compatibility of the products from B&R Industrial Automation GmbH described in this document with hardware and software from third-party suppliers is not contractual content unless this has been separately agreed in individual cases; in this respect, warranty for such compatibility is excluded in any case, and it is the sole responsibility of the customer to verify this compatibility in advance.

Version history

B&R makes every effort to keep documents as current as possible. The most current versions are available for download on the B&R website (www.br-automation.com).

1 General information

1.1 Other applicable documents

For additional and supplementary information, see the following documents.

Other applicable documents

Document name	Title
MAX20	X20 System user's manual

Additional documentation

Document name	Title
MAREDSYS	Redundancy for control systems

1.2 Coated modules

Coated modules are X20 modules with a protective coating for the electronics component. This coating protects X20c modules from condensation and corrosive gases.
The modules' electronics are fully compatible with the corresponding X20 modules.

For simplification purposes, only images and module IDs of uncoated modules are used in this data sheet.

The coating has been certified according to the following standards:

- Condensation: BMW GS 95011-4, 2x 1 cycle
- Corrosive gas: EN 60068-2-60, method 4, exposure 21 days

1.3 Order data

Order number	Short description	Figure
	X20 interface module communication	
X20IF10X0	X20 interface module, 1 redundancy link interface 1000BASE-SX, controller-controller data synchronization module for controller redundancy	
X20cIF10X0	X20 interface module, coated, 1 redundancy link interface 1000BASE-SX, controller-controller data synchronization module for controller redundancy	

Table 1: X20IF10X0, X20cIF10X0 - Order data

1.4 Module description

Interface module for redundant operation of controllers.

- Controller-Controller data synchronization module for controller redundancy system

2 Technical description

2.1 Technical data

Order number	X20IF10X0	X20cIF10X0
Short description		
Communication module	Controller redundancy link module	
General information		
B&R ID code	0xC3B4	0xE239
Status indicators	Module status, bus function	
Diagnostics		
Module status	Yes, using LED status indicator and software	
Bus function	Yes, using LED status indicator and software	
Data transfer	Yes, using LED status indicator and software	
Power consumption	1.93 W	
Additional power dissipation caused by actuators (resistive) [W]	-	
Certifications		
CE	Yes	
UKCA	Yes	
ATEX	Zone 2, II 3G Ex nA nC IIA T5 Gc IP20, Ta (see X20 user's manual) FTZÚ 09 ATEX 0083X	
UL	cULus E115267 Industrial control equipment	
HazLoc	cCSAus 244665 Process control equipment for hazardous locations Class I, Division 2, Groups ABCD, T5	
DNV	Temperature: **B** (0 to 55°C) Humidity: **B** (up to 100%) Vibration: **B** (4 g) EMC: **B** (bridge and open deck)	
CCS	Yes	-
LR	ENV1	
ABS	Yes	
BV	**EC33B** Temperature: 5 - 55°C Vibration: 4 g EMC: Bridge and open deck	
KC	Yes	-
Interfaces		
Fieldbus	Redundancy link	
Standard (compliance)	IEEE Std 802.3, 2002 edition, clause 38	
Variant	1x duplex LC	
Transfer rate	1 Gbit/s	
Transfer		
Physical layer	1000BASE-SX	
Wave length	850 nm	
Cable fiber type	Multimode fiber with 62.5/125 µm or 50/125 µm core diameter LC connector on both sides	
Line length		
MMF 50/125 µm	Min.: 2 m, max.: Up to 500 m	
MMF 62.5/125 µm	Min.: 2 m, max.: Up to 300 m	
Operating conditions		
Mounting orientation		
Horizontal	Yes	
Vertical	Yes	
Installation elevation above sea level		
0 to 2000 m	No limitation	
>2000 m	Reduction of ambient temperature by 0.5°C per 100 m	
Degree of protection per EN 60529	IP20	

Table 2: X20IF10X0, X20cIF10X0 - Technical data

Order number	X20IF10X0	X20cIF10X0
Ambient conditions		
Temperature		
Operation		
Horizontal mounting orientation	-25 to 60°C	
Vertical mounting orientation	-25 to 50°C	
Derating	See section "Derating".	
Storage	-40 to 85°C	
Transport	-40 to 85°C	
Relative humidity		
Operation	5 to 85%, non-condensing	Up to 100%, condensing
Storage	5 to 85%, non-condensing	
Transport	5 to 85%, non-condensing	
Mechanical properties		
Slot	Left IF slot of X20CP368x PLC	Left IF slot of X20cCP368x PLC

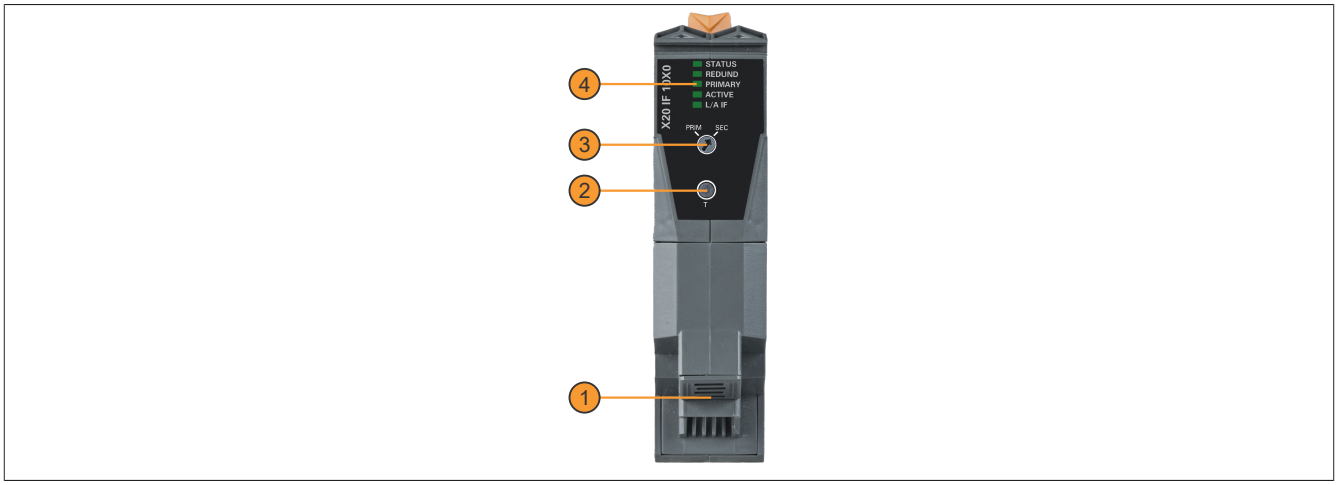
2.2 Operating and connection elements



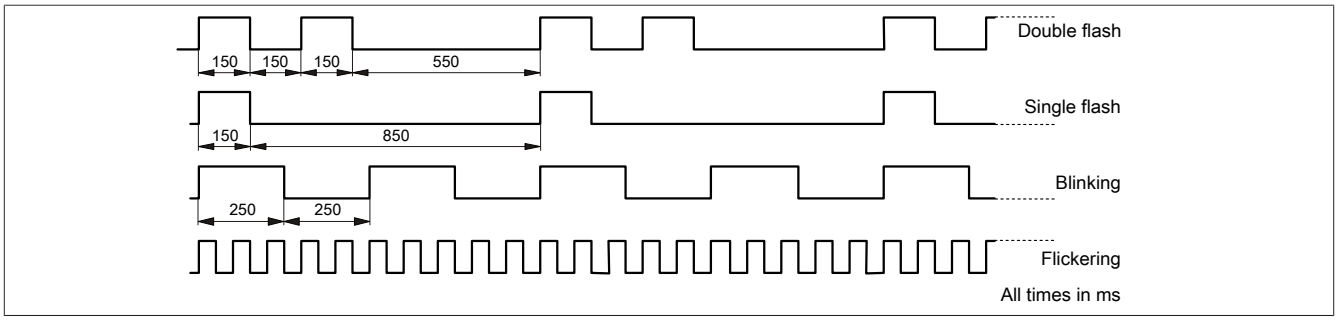
1	Ethernet connection with duplex LC interface	2	Button
3	Primary/Secondary controller selector switch	4	LED status indicators

2.2.1 LED status indicators

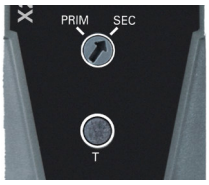
Figure	LED	Color	Status	Description
	STATUS[1]	Green	On	Interface module active
		Red	Blinking	The controller is starting up.
	REDUND[1]	Green	On	A bumpless switchover of the controller is possible.
			Blinking	A minor bump switchover of the controller is possible.
			Double flash	A major bump switchover of the controller is possible.
			Flickering	Application synchronization in progress
		Red	On	A switchover not possible of the controller is not possible. No distinction is made here as to whether a switchover is only temporarily not possible or whether switching over is permanently not possible.
	PRIMARY[1]	Green	On	The redundant controller is the primary controller.
			Off	The redundant controller is the secondary controller.
		Red	On	Impermissible operation of the selector switch: One controller must be configured as primary, the other as secondary. The switch position is not permitted to be changed during operation.
	ACTIVE	Green	On	The redundant controller has active control of the process.
			Off	The redundant controller is not active.
	L/A IF[1]	Green	On	Connection established to redundancy partner
			Blinking	Redundancy link active. Data traffic is taking place for synchronization purposes.
		Red	On	No connection to redundancy partner

1) This LED is a green/red dual LED.

LEDs - Blink times



2.2.2 Switch positions



Selector switch "PRIM SEC" can be used to set the controller as a primary or secondary controller.

When configuring, it is important to ensure that one controller is configured as primary and the other controller as secondary.

Information:

It is not permitted to change the switch position during operation.

The "T" button is used for redundancy switchovers and manually synchronizing the application.

2.3 Derating

The temperatures specified in the technical data apply to operation in the left IF slot of X20CP368x controllers.
When operated in the IF slot of X20CP168x controllers, the maximum temperature specifications are reduced by 5°C.

3 Commissioning

3.1 Firmware

The module comes with preinstalled firmware. The firmware is part of the Automation Studio project. The module is automatically brought up to this level.

A hardware upgrade must be performed to upgrade the firmware included in Automation Studio (see Help "Project management - Workspace - Upgrades" in Automation Help).
