

CPQ dermogel alh/g

Hydroalcoholic hand gel.

COMPOSITION AND PROPERTIES

CPQ dermogel alh / g is a product in gel form, with a high alcohol content, which provides it with a high cleaning and disinfecting effect.

Due to its composition it has an excellent antiseptic power (bactericidal and virucidal). It complies with the UNE-EN 14476 standard: chemical antiseptics and disinfectants: quantitative viricidal suspension test of chemical antiseptics and disinfectants used in medicine: test method and requirements (phase 2, stage 1).

It contains a moisturizing and protective additive to the epidermis, which prevents dry skin. Contains no artificial colors, evaporates quickly, leaves no residue or a sticky feeling on the skin.

TECHNICAL CHARACTERISTICS

Aspect	Clear colorless gel.
pH	6 aprox.
Density 20 °C	0,9 g/cm ³ aprox.

FIELDS OF APPLICATION

CPQ dermogel alh / g is suitable for deep hand disinfection while providing a pleasant sensation and helping to keep the skin in perfect condition.

FORM OF EMPLOYMENT

CPQ dermogel alh / g is used pure. Apply about 3 ml of product to the hand and rub until it evaporates (a few seconds) without forgetting nails, space between fingers and wrists.

HANDLING / STORAGE / SPILL

It is recommended to avoid contact with eyes. Store under cover, avoid extreme temperatures. Waste treatment must be carried out in accordance with current regulations. For more information, consult the product safety data sheet.

Note: The data contained in this document are general indications. Our Technical Department will establish the ideal application conditions for each specific case.
