

## VST FLAME RETARDANT BONDING TAPES.

These grades of flame retardant bonding tapes are of the highest quality and performance level, they will replace mechanical fixings such as screws, nuts and bolts, and also spot welding.

These tapes are classed as structural bonding tapes with the capability to hold heavy weights in dynamic and static situations with excellent durability and long term aging characteristics

The range passes the following aerospace specifications:-

F2 FAR/ JAR 25.853(a) – 12s Vert App F Pt I (a) (1) (ii) Flame retardant

F8 FAR/ JAR 25.853 (d) – Smoke Density App F Pt V Flaming Mode Ds after 4 min.

F9.ABDOO31 – Smoke Density

F10. ABD0031 Toxic Gas Emission.

The VST flame retardant tapes have a variety of applications within the transportation industries, panel bonding in civil aircraft and train manufacture applications in the manufacture of aircraft seating, production of galley equipment, lighting, signs, luggage stowage systems.
