

FIRST-AID CASES • GERMAN DIN

First-Aid Case Programm 2000 CD

Our renowned Programme 2000 CD cases come in 3 different sizes:

- MT-CD 400 x 300 x 150 mm
- SN-CD 310 x 210 x 130 mm
- QUICK-CD 260 x 170 x 110 mm

In a choice of 4 different colours:

- Orange
- Green
- White
- Yellow

Provides plenty of space for a number of fillings:

- German DIN standard fillings
- Tailored fillings in accordance to your country
- Individual fillings like Workplace or Extra

All the cases consist of two identically sized halves, each with internal transparent lids so the products are held securely in place. Rubber sealing prevents the penetration or dirt thus ensuring a hygienic environment for the storage of sterile medical products.

Flexible inner partitioning allows the owner to add or remove products according to his own specific needs and requirements and to clean the inside of the case without much effort. Strong handles, secure locks and security seals combine to enhance security and storage features.

SÖHNGEN® First-Aid Cases with German DIN Fillings now available with case printing in English, Arabic, Dutch and French.

First-Aid Programme 2000 CD cases are manufactured from an extremely resilient ABS (Acrylonitrile-Butadiene-Styrene) thermoplastic, which enhances the cases structural stability, durability and shockproof capability. High temperature and corrosion resistance is guaranteed; all parts are rounded and streamlined with no sharp corners.

First-Aid Case MT-CD
