EMC-optimised motor cable, low-capacitance, double screened
 Allows EN 61800-3-compliant, EMC-compliant installation of power drive systems
 For very large power drive systems

Interference signals

Info

EMC-optimised
 3+3 symmetry reduces common-mode interference effects

Application range

Connecting cable between frequency converter and motor
 Paper industry
 Chemical industry
 Heavy industry

Design

Fine-wire strand made of bare copper wires
 Core insulation: PE
 Cores twisted concentrically (in protective conductors divided into three, this is between the gussets)
 Aluminium foil wrapped over the cores
 Screening: wrapped with braided tinned-copper wires
 4-core design: transparent PVC outer sheath
 3+3 core version: black PVC outer sheath, for outdoor use and direct burial

Norm references / Approvals

Based on VDE 0207 / 0250 / 0295

Product features

Low capacitance design allows a longer cable connection between the frequency converter and the motor
 In dry, damp or wet interiors
 The 2YSLCYK black version can also be used outdoors under direct exposure to UV rays. Buried in the ground is also possible.
 Flame-retardant according to IEC 60332.1.2

Remark

Unless specified otherwise, the shown product values are nominal values. Detailed values (e.g. tolerances) are available upon request.

Copper price basis: EUR 150/100kg. Refer to catalogue appendix T17 for the definition and calculation of copper-related surcharges.
