DESCRIPTION OF CHANGE:

To ensure an improved product assembly, Würth Elektronik will be increasing the size of the ferrite cutout for the lead wire that goes underneath the coil.

In addition, the height specification will be updated. Finally, the inside width, and length reference coil specifications will be updated. The updates to the height specification and the referenced coil inside width and length are datasheet corrections only.

There will be no change in function, quality or reliability of the product.

The new revision of the affected part numbers will be sent out after the previous revision is out of stock (according to FIFO - first-in, first-out).

The preliminary datasheets of the affected part numbers which are available in the online catalogue will be available on the website after the PCN date. Link to the website: [WE-WPCC](#).
