RS Pro Ferrite Sleeve (6.1mm Max Cable Diameter)

Stock No: 136-9029

The Ferrite sleeve is intended to be used to suppress high frequency noise in a cable.

The cable to be screened is passed through the bore of the sleeve, which absorbs energy emitted from the cable.

Data transmitted through the cable will not be adversely affected by the sleeve.

Typical impedance is 120 Ohms at 25MHz and 200 Ohms at 100MHz.

Dimensions:

Diameter: 14.27mm +/- 0.40mm

Length: 28.57mm +/- 0.70mm

Bore: 6.35mm +/- 0.20mm

Material: Nickel Zinc Ferrite

Application: EMI suppression.

Maximum cable diameter: 6.1mm.
