

Endress+Hauser Active barrier RN42-BE1AU

1-channel active barrier with wide-range power supply for the safe transmission and separation of 0/4 to 20 mA standard signal circuits.

Picture for reference only. Product appearance may vary based on configuration

The RN42 is a 1-channel active barrier with wide range power supply for safe isolation of 4 to 20 mA standard signal circuits, HART-transparent. The device has an active / passive current input to which a 2- or 4-wire transmitter can be connected directly. The output of the device can be operated actively or passively. The current signal is then available to the PLC / controller or for further instrumentation at pluggable screw or optional push-in terminals.

- Active barrier, wide-range power supply
- 1-channel
- Compact housing
- Quick and easy wiring

Configuration of RN42-BE1AU:

Approval:	BE	ATEX II3D Ex tc IIIC Dc
Channel:	1	1-channel
Electrical Connection:	A	Screw terminals
Housing Shape:	U	On bottom terminal for power supply, width 17.5mm

Alternative part number: RN42-14U1/0
