RS PRO

Product Description

RS PRO Transparent Polypropylene 12 Compartment Box, 30mm x 170mm x 100mm

This RS PRO no compartment box is a transparent container designed to organise and protect items such as nuts, bolts and screws. You can use this product for storing and transporting goods.
The heavy-duty polyvinyl chloride (PVC) corners and handle protect the container from damage, helping the box retain its form so it won't warp. The lid locks to safeguard your goods from dust and other elements that can cause damage. You can quickly identify the contents through the box's transparent lid and casing, so you don't need to open it to see what's inside.

The product is made from polypropylene plastic (PP), which makes it tough and durable. You can use this no compartment box around the house, in the garage or at your workshop.
