Ply	1
Print	No
Unfolded length	41.5 cm
Unfolded width	35.5 cm

Simplify your cleaning routine with our strong Tork Multipurpose Cleaning Cloth. Ideal for lighter tasks, this soft and flexible 1-ply option tackles both oil and liquid spills – even in hard-to-reach places. These disposable cleaning cloths come with a Tork Handy Box, which improves efficiency as it's quick to open, light to carry and simple to dispose of. The packaging's 100%-recycled fibres boost your sustainable reputation, while the one-at-a-time dispensing feature works to control consumption.

Key benefits:

- Simplify storage and transportation of these cleaning cloths and save time, thanks to their light, portable Handy Box.
- Optimise consumption and minimise waste of cleaning cloths with the one-at-a-time dispensing feature.
- Quickly and easily get hold of cleaning cloths and save time as the Handy Box's large opening means cloths are easy to access.
- Improve your operation's sustainability - this product packaging is made from 100% recycled fibres.

Environmental

Tork exelCLEAN® cloths

This product does not contain any silicone.

Cellulose Pulp
Polyester
Polypropylene
Functional agents or additives

Raw materials

Cellulose Pulp

Cellulose pulp is produced either from softwood or hardwood coming from responsibly managed forests. The wood chips are boiled together with chemicals to remove the lignin between the fibres. The pulp is TCF (Totally Chlorine Free) or ECF (Elementary Chlorine Free) bleached in order to achieve a clean, bright and strong product, but also to increase the hygienic and absorbent qualities.

Polyester

Polyester fibre is produced from terephthalic acid and ethylene glycol, which react through condensation to polyester resin. The molten resin is spun to fibres through spinnerets and cooled with air. The fibers are then cut to intended fiber length.

Polypropylene

Polypropylene or polypropene is a thermoplastic polymer made from oil. The molten resin is spun to endless fibres through spinnerets and cooled by air. The fibres form a web.

Functional agents and additives

Functional additives could be wet strength agent, antistatic agent and wetting additives/tensides.

Food Contact

This product fulfills the legislative requirements for Food Contact materials, confirmed by external certification performed by a third party. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.

Packaging

Fulfillment of Packaging and Packaging Waste Directive (94/62/EC): Yes
