

Colour Coded Bezels

Colour Coded Bezels (FFKCOL* - * indicates colour, ie bk, bl, gn, rd or yw)

These coloured bezels are available in 5 colours and are designed for use with TUK's 24 port patch panel FFK24mtCOL for easier identification of cabling.

Features

- Moveable coloured bezels allow for easy differentiation of data sources
- Black bezel available to fill gaps or to indicate 'standard' wiring
