For Micro-SD Card

## SDHR CONNECTOR Reverse mounting type

1.1mm Pitch

This is the connector for micro-SD card connector in which mounting height of 1.45mm maximum is kept and push-push mechanism is adopted

### ■ Features

*Card insertion entrance of 1.0mm is kept but the mounting height of 1.45 mm is realized.  
The mechanism of preventing a card from jumping out is available.*

*Countermeasure for inverse insertion by 3kg or more force is provided.  
Also card retention force is high in the state of locking card.*

*Although the space saving is realized, wiping function of switch is provided.  
Lead shape provides the easy repair.*

### ■ Specifications

- Current rating : 0.5A AC, DC
- Voltage rating : 100V AC,DC
- Temperature : -25°C to +85°C (including temperature range rise in applying electrical current)
- Contact : 100mΩ max. resistance
- Insulation : 1,000MΩ min. resistance
- Withstanding : AC500V/1minute voltage
- Applicable : 0.6 mm or more PCB thickness
- No.of Circuits : 8-circuit
- Part number : SDHR-8BRS-K-363-A0-P-ETB(HF)
