

1741TR
Riveting pliers with rotating head, supplied with 4 interchangeable nozzles
Features:

- Head can be rotated 360°, for hardly accessible areas to be reached.
- Interchangeable nozzles, capacity ranging from 2.4 mm to 4.8 mm, mounted on body to allow user to select the most suitable one, depending on required application.
- Tightening wrench included; it can be placed in relevant space in handle, so that you can always have it available.
