

Features

- 1 metre length angle
- Angles available in a variety of widths, heights and thickness
- Medium strength aluminium
- Material grade 6082 T6 aluminium
- Multi-purpose use angles

RS PRO Aluminium Angle

30mm x 30mm x 3mm

RS Stock No: 136-8749

RS PRO Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Metal Angle

Product Description

These RS PRO aluminium angles are ideal for use in any commercial or industrial application. The aluminium grade 6082 is a medium strength alloy, with excellent resistance to corrosion. This makes it perfect for all structural projects, and in particular for use on roofs, bridges, transport and all other high stress applications. The T6 denotes the degree of hardness and how this has been attained; these aluminium angles have been solution heat-treated and artificially aged.

General Specifications

Form	Angle
Length	1m
Material	Aluminium
Width	30mm
Height	30mm
Thickness	3mm
Material Grade	T6
