

Standard-Fastening Set 8, one-sided

Standard-Fastening Set 8, one-sided from item connects two Line 8 profiles at a right angle to create a connection that is highly resistant to displacement and torsion. The asymmetrical connecting plate is made of bright zinc-plated steel and projects into a groove to ensure the fastener is correctly aligned so as to prevent torsion. The other groove is left free.

A thread needs to be tapped into the core bore of the first profile to install the fastener. The second profile requires an installation bore and is connected in a fixed position.

Scope of Delivery
