## Next level equipment

Feature	Virtually seam-free water-resistant, breathable microvelour upper	Lightweight design with anatomical tread	Multilayer shock absorption system comprising double layer PU outsole and comfortable insole	Metal free toecap	Heel basket support
					
Advantage	Breathable, eliminates pressure points and keeps feet dry for longer. Suitable for vegans and vegetarians.	Supports the foot's natural movement. Reduced weight.	Outstanding shock absorption under feet especially in heel and forefoot areas.	Compact design with anatomical shape. No thermal conductivity.	Increased stability without limiting movement.
Benefit	Increased product life and high levels of wearer comfort.	High levels of comfort and helps minimise wearer fatigue.	Minimises potential back, knee and joint problems particularly when standing.	Does not restrict the natural movement of the foot. Increased comfort.	Offers greater twist protection for reduced risk of sprains.
