

Mini Maglite® AAA LED Product Fact Sheet

Description

The heir to the original Mini Maglite® 2 AAA flashlight launched 25 years ago - features the same classic look and size and the same simple operation – just twist the head to turn it on, turn it off and focus the beam.

Thanks to the latest generation LED light engine, the Maglite® AAA LED produces a very bright, intense beam from a pocket sized flashlight that's not much bigger than a penlight.
