

TECHNICAL DATA SHEET

Drei Bond Plastic Cleaner

Revision: 25.06.2025
Version: 1.000

PRODUCT PROPERTIES

The Drei Bond Plastic Cleaner is optimized for use on plastics and it is designed in such a way that it does not cause stress cracks in contact with the majority of materials. It effectively cleans plastics as well as metallic and other non-metallic surfaces from grease, oils, dust, and many other types of contaminations. After wiping of the cleaner, residues of the cleaner evaporate completely without leaving any traces within short time.

- Very good compatibility with most plastics (prevents stress cracks)
- Very effective against oils, grease, and many other contaminants
- Specifically developed for cleaning surfaces intended for bonding or sealing
- Evaporates without leaving any residue
- The product contains no dioxolane

PHYSICAL PROPERTIES

Appearance	Liquid in a pressurized gas container; aerosol
Color	colorless
Odor	characteristic
Auto-ignition temperature	> 350 °C
Boiling point/boiling range	≤ 0 °C
Flash point	≤ -20 °C
Density (20 °C)	≈ 0.7 g/cm ³
Solubility and miscibility in/with water	partially miscible

DIRECTIONS FOR USE

- Spray Drei Bond Plastic Cleaner on the surface to clean, wipe it off with a clean, lint-free cloth or alternatively blow it off with (clean) compressed air.
- For contaminations that are difficult to remove, allow the cleaner to work for a short time before wiping it off.
- The compatibility of the cleaner with different materials should always be tested in an inconspicuous area or, preferably, on a separate part before use.

SAFETY AND HANDLING

- Please consult the Safety Data Sheet before use. Reserved for industrial and professional use.
- Extremely flammable aerosol.
- Pressurised container: May burst if heated.
