

Pressure sensors SPAN

Pressure sensors SPAN

Features

At a glance

Communication interface

Universal pressure measurement

- Pressure and vacuum
- 13 pressure measuring ranges
- All common pressure units
- Optional inspection report

Quick installation

- L1 plug connector for fast commissioning
- M8 electrical adapters enable maximum flexibility
- Wide range of mounting options
- QS4 quick connector

Convenient design

- Compact design 30x30 mm
- Degree of protection IP40
- Reduced weight with QS4

Easy operation

- Clear 2-line display
- Configurable, red perimeter of entire display
- Intuitive menu navigation

Switchable electrical outputs

- Various switching functions
- Switching outputs (PNP/NPN, NO/NC)
- Analogue outputs (0...10V, 1...5V, 4...20 mA)

Product description

The pressure sensor SPAN is suitable for monitoring compressed air and non-corrosive gases. The sensor can be used in many branches due to the compact design. The measuring method is based on a piezoresistive measuring cell for relative pressure measurement. The pressure value is transmitted to the connected control system as a switching signal, as an analogue signal or via IO-Link depending on the sensor variant and selected parameters.

Area of application

- Network monitoring (pressure present)
- Regulator monitoring (pressure in the setpoint range)
- Vacuum (part suctioned)
- Leak test (pressure drop over time)
- Object detection (back pressure present)

Functions

- Monitoring and setting of a pressure threshold, a pressure range or a pressure difference using a teach-in function or by entering values
- ECO function with option to set display switch-off
- Optional security code can be freely chosen (4-digit code)
- Adjustable low-pass filter for smoothing the pressure signal
- Scaling the analogue output to increase the signal dynamics
- Offset compensation possible
- Min./max. value memory for monitoring the compressed air
- All settings that have been carried out on one sensor (master) can be transferred (replication) to identical sensors (device)

Variants with IO-Link

- Serial communication integrated using IO-Link 1.1
- Cyclic transmission of two switch statuses and the measured value of the pressure
- Remote parameterisation of the sensor is possible using an IO-Link master
- Easy sensor replacement with automatic parameterisation (hot swap)
- Sensor identification, diagnostics and teach-in possible via IO-Link

Connection in 2 steps

- 1 Insert the L1 plug connector
- 2 Insert the tube

Pressure sensors SPAN

Features

Mounting options

Front panel mounting

Manifold mounting with mounting bracket

Threaded mounting with M8 adapter

Wall mounting

Ordering data – product options

Configurable product
This product and all its options can be ordered using the configurator.

The configurator can be found under Products on the DVD or at
→ www.festo.com/catalogue/...

Enter the type (or part number) in the search field:
