| Acknowledgements | 9 |
| Preface | 10 |
| Introduction | 11 |
| Chapter 1 Protective earthing | 13 |
| 1.1 Protective earthing | 13 |
| 1.2 Source earthing | 13 |
| 1.3 The purpose of source earthing | 14 |
| 1.4 The purpose of electrical equipment earthing | 14 |
| Chapter 2 The means of earthing | 17 |
| 2.1 The means of earthing | 17 |
| 2.2 Distributors' facilities | 17 |
| 2.3 Earth electrodes | 18 |
| 2.4 Rod electrodes | 18 |
| 2.5 Tape and wire electrodes | 20 |
| 2.6 Plate electrodes | 20 |
| 2.7 Structural metalwork electrodes | 21 |
| 2.8 Metal covering of cables for electrodes | 22 |
| 2.9 Location of the installation earth electrode | 23 |
| 2.10 Resistance of the earth electrode | 23 |
| 2.10.1 Calculating the resistance of a rod electrode | 25 |
| 2.10.2 Calculating the resistance of a plate electrode | 26 |
| 2.10.3 Calculating the resistance of a tape electrode | 26 |
| 2.10.4 Limiting values of the electrode resistance for TT systems | 26 |
| 2.11 Electrode installation | 27 |
| 2.12 Electrode loading capacity | 28 |
| 2.13 Measurement of the electrode resistance | 29 |
| 2.13.1 Proprietary earth electrode test instrument | 29 |
| 2.13.2 Earth fault loop impedance test instrument for measuring electrode resistance | 30 |
| 2.14 Determination of the external earth fault loop impedance, Z_e | 31 |
| 2.15 Responsibility for providing a means of earthing | 32 |

| | | |
|------------------|--|-----------|
| Chapter 3 | The earthing conductor | 33 |
| 3.1 | The earthing conductor | 33 |
| 3.2 | The cross-sectional area of an earthing conductor | 34 |
| 3.3 | The csa of a buried earthing conductor | 36 |
| 3.4 | Minimum csa of an earthing conductor | 36 |
| 3.5 | Impedance contribution of an earthing conductor | 36 |
| 3.6 | Colour identification of an earthing conductor | 36 |
| 3.7 | Protection of an earthing conductor against external influences | 36 |
| 3.8 | Disconnection of the earthing conductor | 37 |
| 3.9 | Connection of the earthing conductor to the means of earthing | 37 |
| Chapter 4 | System types and earthing arrangements | 39 |
| 4.1 | A system | 39 |
| 4.2 | TN-C system | 40 |
| 4.3 | TN-S system | 42 |
| 4.4 | TN-C-S (PME) system | 43 |
| 4.5 | TT system | 45 |
| 4.6 | IT system | 47 |
| Chapter 5 | Protective equipotential bonding | 49 |
| 5.1 | The purpose of protective equipotential bonding | 49 |
| 5.2 | Main protective bonding conductors | 52 |
| 5.2.1 | Cross-sectional area | 54 |
| 5.2.2 | Identification | 56 |
| 5.2.3 | Supports | 57 |
| 5.2.4 | Additions and alterations | 58 |
| 5.3 | Earth-free local equipotential bonding | 59 |
| 5.4 | Bonding of lightning protection systems | 60 |
| 5.5 | Extraneous-conductive-parts common to a number of buildings | 61 |
| 5.6 | Installations serving more than one building | 63 |
| 5.7 | Multi-occupancy premises | 67 |
| Chapter 6 | Extraneous-conductive-parts and their connections | 69 |
| 6.1 | Definition of an extraneous-conductive-part | 69 |
| 6.2 | Some examples of extraneous-conductive-parts | 71 |
| 6.3 | An example of a conductive part which is not an extraneous-conductive-part | 71 |
| 6.4 | Connection to pipework | 72 |
| 6.5 | Connections to structural steelwork and buried steel grids | 75 |
| Chapter 7 | Automatic disconnection | 77 |
| 7.1 | Automatic disconnection of supply (ADS) | 77 |
| 7.2 | TN systems | 77 |
| 7.2.1 | Earth fault loop impedance | 78 |
| 7.2.2 | Automatic disconnection using an RCD in TN systems | 83 |

| | | |
|------|--|----|
| 7.3 | TT systems | 83 |
| 7.4 | IT systems | 84 |
| 7.5 | Additional protection | 85 |
| 7.6 | RCDs in series | 86 |
| 7.7 | Automatic disconnection for reduced low voltage circuits | 87 |
| 7.8 | Automatic disconnection and alternative supplies | 90 |
| 7.9 | Separated extra-low voltage systems (SELV) | 90 |
| 7.10 | Protective extra-low voltage systems (PELV) | 91 |
| 7.11 | Functional extra-low voltage systems (FELV) | 92 |

Chapter 8 Supplementary equipotential bonding 93

| | | |
|--------|--|-----|
| 8.1 | The purpose of supplementary equipotential bonding | 93 |
| 8.2 | Supplementary bonding conductor types | 95 |
| 8.3 | Csa of supplementary bonding conductors | 95 |
| 8.4 | Limitations on resistance of supplementary bonding conductors | 96 |
| 8.5 | Supports for supplementary bonding conductors | 97 |
| 8.6 | Bath and shower rooms | 98 |
| 8.7 | Shower cabinet located in a bedroom | 101 |
| 8.8 | Swimming pools and other basins | 101 |
| 8.9 | Agricultural and horticultural premises | 104 |
| 8.10 | Conducting locations with restricted movement | 107 |
| 8.10.1 | Medical locations | 109 |
| 8.11 | Temporary electrical installations for structures, amusement devices and booths at fairgrounds, amusement parks and circuses | 110 |
| 8.12 | Static convertors | 110 |
| 8.13 | Other locations of increased risk | 110 |
| 8.14 | Where automatic disconnection is not achievable | 111 |

Chapter 9 Circuit protective conductors 113

| | | |
|-------|---|-----|
| 9.1 | Circuit protective conductors | 113 |
| 9.2 | Cross-sectional area | 114 |
| 9.2.1 | Calculation of csa – general case | 114 |
| 9.2.2 | Selection of csa – general case | 115 |
| 9.2.3 | Non-copper CPCs | 116 |
| 9.2.4 | Evaluation of k | 117 |
| 9.3 | Armouring | 118 |
| 9.3.1 | Calculation of csa – armoured cable | 118 |
| 9.3.2 | Selection of csa – armoured cable | 118 |
| 9.3.3 | Contribution to earth fault loop impedance | 119 |
| 9.3.4 | Armouring inadequate for a CPC | 119 |
| 9.3.5 | Termination of armoured cables | 119 |
| 9.4 | Steel conduit | 121 |
| 9.4.1 | Calculation of csa – steel conduit | 121 |
| 9.4.2 | Selection of csa – steel conduit | 123 |
| 9.4.3 | Maintaining protective conductor continuity | 123 |

| | | |
|---|---|------------|
| 9.5 | Steel trunking and ducting | 124 |
| 9.5.1 | Maintaining protective conductor continuity | 124 |
| 9.6 | Other metal enclosures | 124 |
| 9.7 | Terminations in accessories | 125 |
| 9.8 | CPC for protective and functional purposes | 127 |
| 9.9 | Significant protective conductor currents | 128 |
| 9.9.1 | Equipment | 130 |
| 9.9.2 | Labelling at distribution boards | 131 |
| 9.9.3 | Ring final circuits | 131 |
| 9.9.4 | Radial final circuits | 132 |
| 9.9.5 | Busbar systems | 132 |
| 9.9.6 | Connection of an item of equipment (protective conductor current exceeding 10 mA) | 133 |
| 9.9.7 | TT systems | 134 |
| 9.9.8 | RCDs | 135 |
| 9.10 | Earth monitoring | 135 |
| 9.11 | Proving continuity | 136 |
| Chapter 10 Particular issues of earthing and bonding | | 137 |
| 10.1 | Clean earths | 137 |
| 10.2 | PME for caravan parks | 138 |
| 10.3 | Exterior semi-concealed gas meters | 139 |
| 10.4 | Small-scale embedded generators | 140 |
| 10.4.1 | Statutory regulations | 140 |
| 10.4.2 | Engineering Recommendation G83 | 141 |
| 10.4.3 | Means of isolation | 142 |
| 10.4.4 | Warning notices | 142 |
| 10.4.5 | Up-to-date information | 143 |
| 10.4.6 | Guidance Note 7: <i>Special Locations</i> | 143 |
| 10.5 | Mobile and transportable units | 144 |
| 10.5.1 | The term 'mobile or transportable unit' | 144 |
| 10.5.2 | Examples of mobile or transportable units | 144 |
| 10.5.3 | The risks | 144 |
| 10.5.4 | Reduction of risks | 145 |
| 10.5.5 | Supplies | 145 |
| 10.5.6 | TN-C-S with PME | 146 |
| 10.5.7 | Protective measures | 146 |
| 10.5.8 | Additional protection | 146 |
| 10.6 | Highway power supplies and street furniture | 147 |
| 10.6.1 | Street furniture and street located equipment | 147 |
| 10.6.2 | Street furniture access doors | 148 |
| 10.6.3 | Earthing of street furniture access doors | 148 |
| 10.6.4 | Earthing of Class 1 equipment within street furniture | 148 |
| 10.6.5 | Distribution circuits | 148 |
| 10.6.6 | Temporary supplies | 148 |

| | | |
|--|---|------------|
| 10.7 | Suspended ceilings | 149 |
| 10.8 | Exhibitions, shows and stands | 150 |
| 10.8.1 | Protection by automatic disconnection of supply | 150 |
| 10.8.2 | Distribution circuits | 150 |
| 10.8.3 | Installations incorporating a generator | 151 |
| 10.8.4 | Final circuits | 151 |
| 10.9 | Medical locations | 151 |
| 10.9.1 | Type of system earthing | 152 |
| 10.9.2 | SELV and PELV | 152 |
| 10.9.3 | Fault protection | 152 |
| 10.9.4 | TT systems | 153 |
| 10.9.5 | Medical IT systems | 153 |
| 10.9.6 | Transformers for a medical IT system | 153 |
| 10.9.7 | Supplementary equipotential bonding | 154 |
| 10.10 | Marinas | 155 |
| 10.10.1 | The risks | 155 |
| 10.10.2 | Minimising the risks | 155 |
| 10.10.3 | Protection against electric shock | 155 |
| 10.10.4 | TN system | 156 |
| 10.11 | Cable tray and cable basket | 157 |
| 10.12 | EMC earthing and bonding | 158 |
| Appendix A: Values of k for various forms of protective conductor | | 159 |
| Appendix B: Data for armoured cables | | 161 |
| Index | | 165 |
