ITT Cannon Product Change Notification
APD Series Material Change

Dear Valued Customer:

As a follow-on to our April 2021 Product Change Notification ("PCN") regarding the APD Series products, ITT Cannon GmbH ("ITT") is issuing this PCN to inform you that ITT has qualified our new suppliers and completed testing of alternative raw material for our APD Series. The new qualified material will not alter the form, fit or function of our APD Series. Furthermore, given continued market shortages on raw materials, the qualification of the new suppliers and material will help reduce ITT's risk of production delays.

Effective as of 10 days from the date of this PCN, ITT will start using the new qualified raw material in the production of the part numbers listed below. To ensure that you have received this letter and approve our use of the new material, we request that you provide written approval of this change by signing where indicated at the bottom of this letter and return to your respective Customer Service Representative. To ensure continuity of supply, we are seeking your prompt response. If we do not receive a response from you within five (5) business days from the date of this PCN, we will assume that you approve of this change.
